

Email 1

Email 1:

Is this email Safe or Malicious?	My Analysis
Safe	<ul style="list-style-type: none">• By seeing this email we can't determine that email comes from which country.• The email sender is not requesting for any kind of personal information.• In the email there is no suspicious thing (link or attachment) that can harm to the recipient.• In the above email it is a normal communication being taken place between both of them.• Overall the email is not very professional. It is far too generic using terms that could apply to almost anyone and anywhere. The email provided is not a business email. It is a personal email.• The name the email uses is consistent with the display name.

- Finally the email don't tries to instill a sense of urgency. We can say that it is a safe email.

Email 2

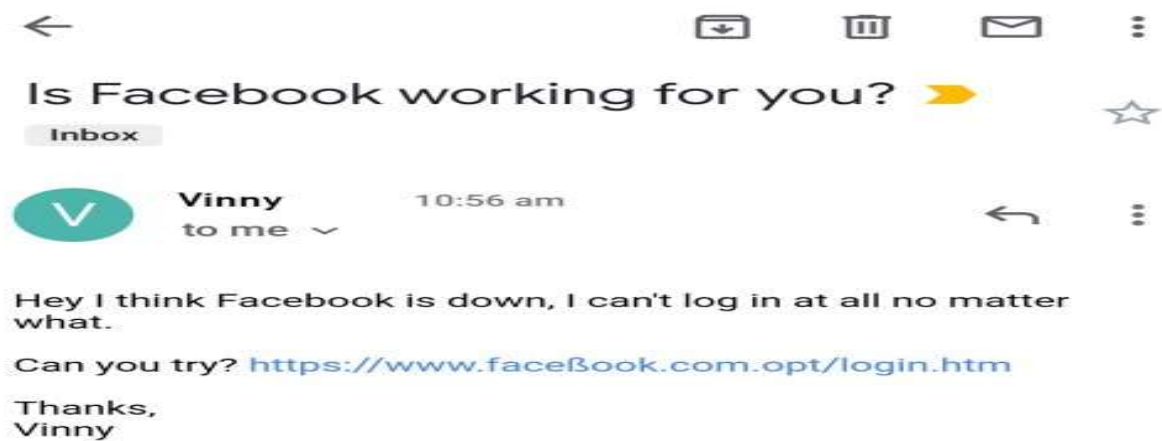

Email 2:

Is this email Safe or Malicious?	My Analysis
Malicious	<ul style="list-style-type: none"> • In this mail sender not mentioned the name of customer while Microsoft always mention the customer name. • The forcing to click on the provided link for thefting of personal information. • The given link is created by hypertext link. • The sender asking to the customer to update account by that the customer can upload the large size of the document in the one drive. • The Microsoft never send a mail only for 1 document that can not be fit in the customer's drive account. • The sender trying to make the mail professional but it isn't. • This is a phising technique to steal credential information about any persons.

- In last we can say that it is a malicious mail.
- To avoid the theft of information , I suggest that if the customers have to update their account they vcan visit official website and there he use to log in and update their information. Don't directly click on the link.

Email 3:

Is this email Safe or Malicious?	My Analysis
Malicious	<ul style="list-style-type: none"> • In the email sender is asking if facebook working or not? • Sender also ask to click on given link that is fake and trying to steal login credential of user's facebook account credential. • In the eamil it is clearly seen that in the spelling of facebook "b" is modified and note correct url. • It is a type of phising method by that sender creates a fake login page and share the url to user and ask to click on the given link.

- | | |
|--|--|
| | <ul style="list-style-type: none">• It is suggested to user's don't click on such type of links and use official website to do login, to be safe.• Over all this mail is not professional, Send for thefting login credential it is a type.• The email contains .opt format that can stand for optional practical traing.• At last this is a suspicios email. |
|--|--|

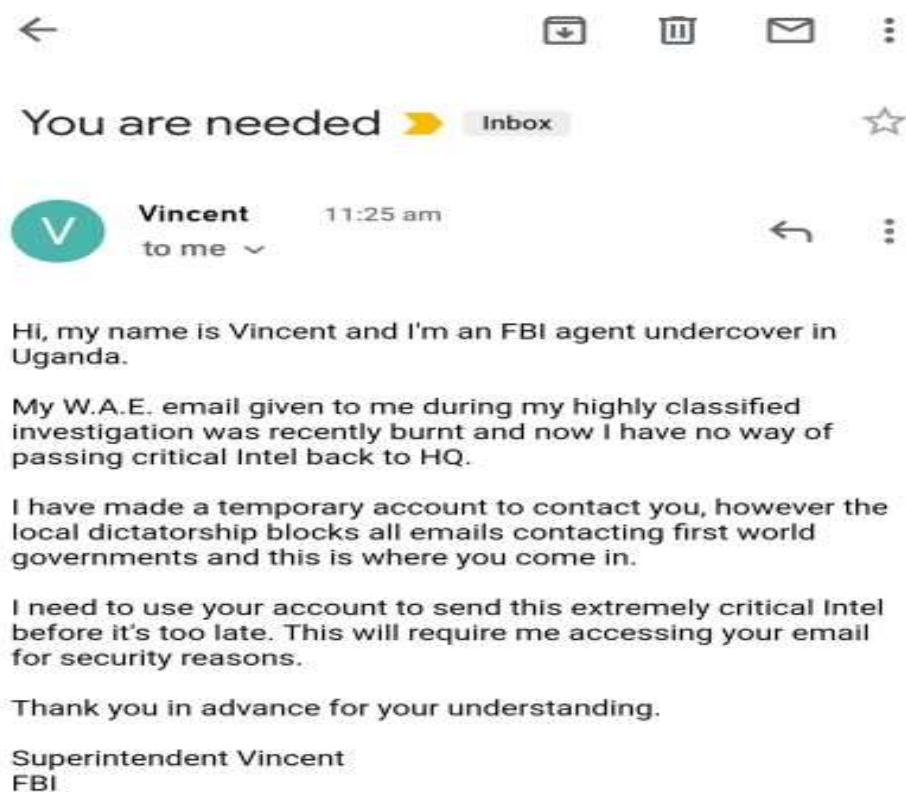

Email 4

Email 4:

Is this email Safe or Malicious?	My Analysis
Safe	<ul style="list-style-type: none"> • This a forwarded email. • This email is basically forwarded for advertiesment purpose. • In this email there are no suspicious link or attchment that can harm the recipient. • The name the email uses is consistent with the display nam. • We can say that it is a safe mail that intention is only for advertiesment purpose and nothing.

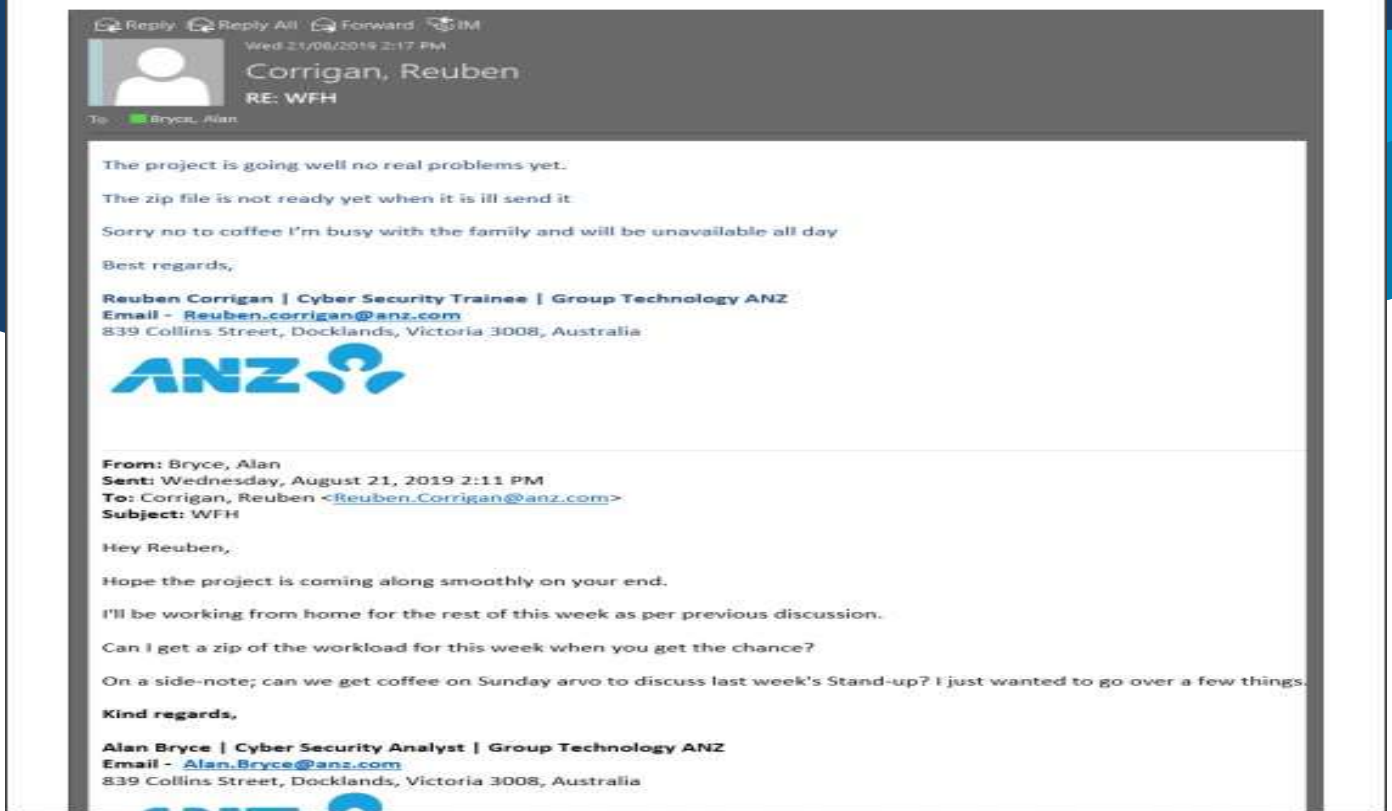

Email 5

Email 5:

Is this email Safe or Malicious?	My Analysis
Malicious	<ul style="list-style-type: none">• It is type of email impersonation.• In the mail sender shows that he is a FBI agent, but any government agent don't reveal their identity to a public person.• In the mail sender showing that it is a urgency, ant want to get user email's credential to send informayion but any government employee don't ask any kind of personal information that can leak the privacy of any person.• Overall the sender want to get credential of email by that the sender can access the user email account and make fraud.• So I suggest do not take this type of email seriously and avoid and delete the mail to safety of their credential.• This is enough to mark the email as suspicious.

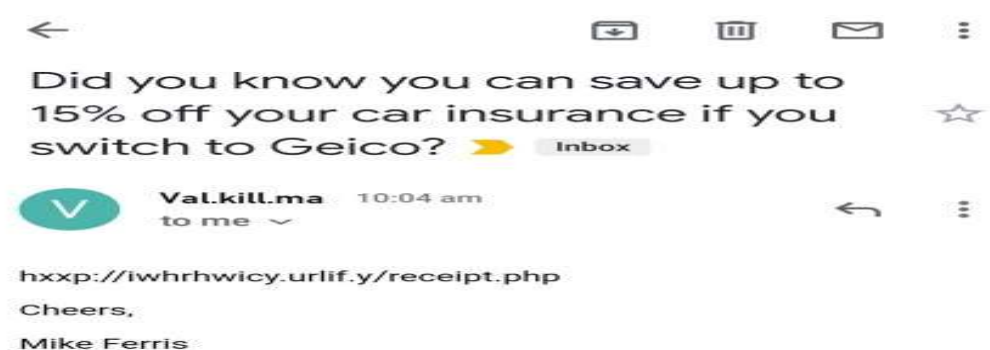

Email 6

Email 6:

Is this email Safe or Malicious?	My Analysis
Safe	<ul style="list-style-type: none"> • This mail is a professional mail that was used to communicate between two employee and asked for project's ZIP file. • In the mail there is no attachment or suspicious link that can harm receiver. • It's intention is only for knowing work done on the project and ask for coffee on the Sunday. • This mail was used to conversation between two employee of ANZ company and it is a official mail of the company The word ANZ in capital letter same as company logo. • On the basis of the above analysis we can say this is a safe mail.

Email 7

Email 7:

Is this email Safe or Malicious?	My Analysis
Malicious	<ul style="list-style-type: none">• This is a suspicious email.• This shows advertisement and offer that giving upto 15% off on car insurance, but looking not safe at first visual.• This is fake link created by using any tool.• It's intention is to do theft of information.• It is not safe mail.• In this sender want to do phishing.• In this email there is a suspicious link provided.• It's enough to say that it is malicious.
